v2.6.3 & Mobile 3.4.5

Section	Feature	Details
Mobile	Orders	Update to language: Is Antibiotic? replaced with Treating an Infection?
Mobile	PCG Signature	PCG signature cannot be submitted earlier than 15 minutes prior to end of assignment
Mobile	PCG Signature	If tasks exist outside scheduled start and end PCG cannot sign - will see warning '2 completed tasks currently outside 0700-1900 and need to be corrected'
Mobile	PCG Signature	The PCG time picker now defaults to the actual clock in (when clinician clicked clock in) and actual clock out (when the PCG signature page is accessed = now)
Mobile	PCG Signature	If the clinician has two visits in the same day that over-lap there will be a warning to PCG upon signing; can be ignored
Mobile	Remove PCG Sign	If web user removes PCG Sign app user will receive prompt they are being logged out; once they log back in they can get new PCG Sign
Web Visit	Signatures	All of the mobile functionality also applies to any visit completed on the web
Mobile	Bug Fix	Update search bar in app to clearly show text
Mobile	Bug Fix	Updated seizure movement type to include Absence, Atonic, Myoclonic, Tonic-clonic
Mobile	Bug Fix	Corrected issue when Intervention scheduled twice in the same hour was dropping off
Mobile	Bug Fix	Optimized med list download to prevent being kicked out of app
Mobile	Bug Fix	Corrected an issue with invalid error 'missing answers in initial assess' fields at submit
Mobile	Bug Fix	Opened up clock in window for overnights to 4am (previously 12a)
Mobile	Bug Fix	Corrected an issue with viewing 485 in app for non-PDN services
