Mobile 3.2.13

| Type	Section	Details
Feature	Completed Tab*	Completed tasks saved with a time that does not fall between visit times will be highlighted in red
Feature	Completed Tab*	Completed tasks 'show outside visit time' toggle to view only those that need to be addressed
Feature	Restricted Clock In	Added exclusion to clock in restriction: visits on the same day may be active at the same time
Feature	IDD Intervention	Forced requirement to save IDD interventions in app: intervention, assessment & activity fields
Bug Fix	Narrative	Updated text box fields to have continuous scroll to allow for extended text visibility
Bug Fix	Visit List	Corrected issue with 0000 start time visit; now appear ad of 4 hours prior at 2000
Bug Fix	Scheduled Tasks	Stopped re-set of frequency tasks when visit time is updated at PCG signature; will only show anything that still need to be completed it additional time before or after original scheduled time is added
Bug Fix	Input/Output Type	Corrected issue when I/O type intervention saved user could not edit the type after saving
Bug Fix	Initial Assessment	Corrected a data issue when saving tasks before saving initial assessment caused some initial assess drop downs to lose function

*see attached which has also been added to Mobile App Guide

Tasks Outside Visit Times

- When you are warned at submit that you have tasks outside visit times navigate to the completed tab.

- All tasks saved outside your visit times will be highlighted in red (left picture)

- To view only items that are outside your visit times click the show outside visit times button (right picture)

- Edit any tasks outside your visit times by clicking on them and selecting edit.

- Once a task time is update and falls within your visit start and end time it will no longer be red

- Tasks marked as completed by PCG are still an exception and do not need to fall within visit times and will not be highlighted red
