

Release v4.4

CubHub Systems

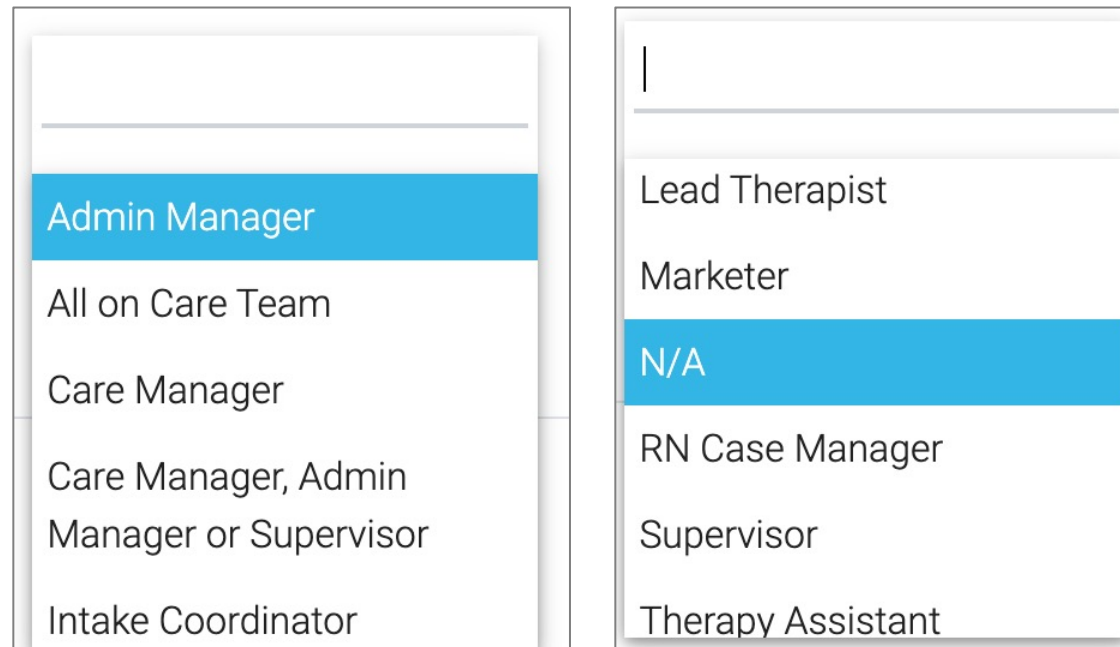

June 2022

Notifications

Notification drop downs updated to include all Care Team roles in Permissions and Users. Notifications can be accessed in the Permission group or in an individual user's settings.

[Admin> Permissions> Select Permission Group> Notifications](#)

[Admin> Users> Select Users> Notifications](#)

Payer Option

A payer may be marked to 'EVV exact times,' so auto-verify will not occur unless EVV actual matches billed time exactly.

[Billing](#)> [Payers](#)> [Select Payer](#)> [Check box for 'EVV Exact Times'](#)> [Save](#)

Pending Quote of Benefits

Therapy Re-Evals

Therapy re-evals will display prior standardized test results if the same test(s) performed on the current re-eval. Test descriptions will also now show on the PDF for the re-eval.

CAAP-2 Scores:

Test	Raw Score	Standard Score	Percentile	Age Equivalent
Consonant Inventory Score	1	2	3	4

The Clinical Assessment of Articulation and Phonology (CAAP2) is a norm-referenced instrument designed to assess English articulation and phonology in children ages 2.6 to 11.11. the CAAP 2 provides standard scores, percentile ranks and age-equivalents in up to 3 areas: Consonant Inventory, School age Sentences and Phonological Process, depending on age. The CAAP 2 has a mean of 100 with a standard deviation of ± 15

School-Age Sentences Score	1	2	3	4
----------------------------	---	---	---	---

The Clinical Assessment of Articulation and Phonology (CAAP2) is a norm-referenced instrument designed to assess English articulation and phonology in children ages 2.6 to 11.11. the CAAP 2 provides standard scores, percentile ranks and age-equivalents in up to 3 areas: Consonant Inventory, School age Sentences and Phonological Process, depending on age. The CAAP 2 has a mean of 100 with a standard deviation of ± 15

Therapy Goals

Baseline of a goal may now be recorded at the time the goals is added (user doesn't have to add then re-access).

Orders (Goals & Goals)
